CRYSTAL VISION

IN GOLD AND SILVER

RELAXATION
CALMNESS
WELL-BEING

Feel the pleasant effect of the holographic
faceted crystals

Peter Mandel Crystal Vision

In cooperation with the Swarovski Company we have developed a highly sophisticated procedure to produce therapy crystals with targeted information: the large crystal activator, the set of faceted crystals and the crystal tattoos for crystal puncture. The pure crystals are enhanced by cut or engraved holographic primary patterns of the earth's hologram. We believe that this hologram corresponds to the intrinsic human body-related information patterns.

The crystal activator was developed for therapy procedures in depth psychology to help facilitate recall of suppressed or forgotten experiences. Crystal puncture is used successfully today in the area of pain therapy. For more than three years we have been observing the effects of the crystal applicators in the treatment of a wide variety of conditions. So far, successful results have been above average. We are pleased to have the opportunity to present our new set of crystals:

The Gold and Silver Faceted Crystals

While the activator affects and encompasses the entire organism, the faceted crystals can target details by means of their cut, engraving and color, making them suitable for use on specific zones of the body. We can observe that the faceted crystal in gold, when placed on the correspondingly sensitive zones, generates feelings of peace and tranquility. The increasing success of the gold faceted crystals inspired us to realize the other side of polarity. The effects of stress in our lives today cannot be underestimated in regard to their contribution to illness and pain. All over the world, doctors warn about the consequences. New zones have been discovered for the faceted crystals. The crystals are easy to apply and generate the desired effects.

Gold and Silver – the colors of the polarity between sun and moon

Symbol of the sun → gold, sun, warmth, activity,
masculinity, our outer psyche

Symbol of the moon → silver, moon, coldness, passivity,
femininity, our inner psyche

THE GOLD CRYSTAL

→ The effect is overall relaxation as well as stimulation of body coordination. The zones are also used in treating a dull headache or a heavy feeling in the legs. Both zones → gold crystal

- Positions:
1. at the hairline
 2. on the chin

→ These three zones on the face, when used one after the other, generate deep relaxation of the entire body and also dissolve the lingering effects of daily stress.

All three zones → gold crystal

- Positions:
1. at the hairline
 2. on the bridge of the nose
 3. on the mouth

→ This combination affects head as well as pelvic strain. It can be used on children who have problems with concentration. It is also helpful for older people with diminished mental function, as well as for those suffering from so-called "mental stress".

All three zones → gold crystal

- Positions:
1. at the hairline
 2. at the outer edge of the eyebrows, first left, then right

→ Zones affecting nervous reactions:

These zones are especially effective in children, particularly in those with ADD, ADHD and ASD (attention deficit disorders).

Both zones → gold or silver crystal

- Positions:
1. above the bridge of the nose
 2. on the mouth

→ Zones affecting determination and activity:

First we place the gold crystal on the right and the silver crystal on the left. Both crystals should remain in place for five minutes. Then we place the gold crystal on the chin for five minutes. Together: stimulation of strength and activity.

Positions:

1. above the right eye in the middle of the forehead → gold crystal
2. above the left eye in the middle of the forehead → silver crystal
3. underneath the chin → gold crystal

→ Zone affecting inner freedom:

This zone is located in the middle of the sternum and it signifies inner freedom. The counterpart of this zone lies exactly opposite, in the center of the thoracic spine.

→ gold crystal, or if there is an adverse reaction, the silver crystal

- Position:
1. the center of the sternum

→ Counterpart of the zone on the sternum:

This is where the day's tensions are dissolved. In addition, forward radiating stiffness may be relieved.

→ gold crystal

Position:

1. on the spine, opposite the center of the sternum

→ This zone relaxes the back and legs as well as the forehead.

→ gold or silver crystal

Position:

1. in the center of the sacrum

THE SILVER CRYSTAL

→ Basic position for the silver crystal:

The basic position for the silver crystal is located in the middle of the left side of the forehead. Here all aspects of the “dark side” are influenced. All forms of emotional stress are positively affected.

→ silver crystal

Position:

1. above the left eye in the middle of the forehead

→ The navel is regarded as the center of the “feminine”. Treatment here affects inner aggression, which gradually causes the body to turn against itself.

→ silver crystal (in case of adverse reaction, the gold crystal)

Position:

1. the navel

→ The four zones affecting fear
Fear has the power to both inhibit and motivate. The four zones can provide the impetus to overcoming fear. The crystals should remain in place on each zone for two minutes as they progress through the sequence.

→ left side: silver crystal, right side: gold crystal

Positions:

1. place the silver crystal on the patella (kneecap) of the left knee and the gold crystal on the patella (kneecap) of the right knee
2. place the silver crystal on the left shoulder, in front, directly underneath the shoulder cap and the gold crystal on the right shoulder.

→ Zones affecting release

The zones affecting release are located next to the nose, underneath the zygomatic arch. They are associated with the sectors of the lower pelvis. Tension in the sacrum as well as in the abdomen may be released through treatment here.

Position:

1. next to the nose underneath the zygomatic arch, silver crystal → left, gold crystal → right

→ Zone affecting closure:

We must always finalize something before we are able to begin a new undertaking. This zone on the back of the head above a small bony protrusion releases forms of inner stress and tension associated with the concepts of “releasing”, “letting go” and “finishing closure”. We place or hold the silver crystal for five minutes on this zone. During the procedure we are often able to detect an inexplicable feeling of relief.

→ silver crystal

Position:

1. above the occipital bone

→ These zones influence stress in the lower abdomen, pelvis, hips and legs.

Positions:

1. on the mouth → gold crystal
2. on the outer cheekbones
left → silver crystal
right → gold crystal

→ Zones affecting the interior of the heart:

Here too, the crystals are placed one after the other. Release of inner tension. Positions:

1. zone affecting the interior of the heart → on the bridge of the nose → silver crystal
2. zone affecting masculine activity: The zone is located above the right eye in the middle of the forehead → gold crystal
3. zone affecting feminine activity: The zone is located above the left eye in the middle of the forehead → silver crystal

The concept of love is light, sun, warmth – the positive within us. It is expressed through the sun. On the other hand, fear, darkness, and the coldness of night are connected with the opposite pole. These are metaphors for the moon.

The great success of the gold crystal is continued through the engagement of the opposite pole: through the faceted crystal in silver.

Do not treat more than three zones. The stone should always remain on the designated positions for two to three minutes in order to achieve the relaxing effect.

The small hole on the end of the crystal is orientation aid for the user. It should always be pointed upward along the medians. Place the crystal with the faceted side touching the body. After use, clean the crystal under running water. Do not use cleaning agents.

In case of adverse reactions, remove the stone and apply it to the next zone.

In general it is possible to use either the gold or the silver crystal on all zones. Combining the zones through the polarity of gold and silver as illustrated in this brochure, produces a more intense effect. Self-treatment with the gold and silver crystals is easy and effective.

You can also wear the crystal as a necklace. We have drilled a small hole on the outer edge. You can suspend the gold or silver crystal on a chain or strong thread and wear it directly on the zone on the sternum. This produces an overall feeling of well-being.

We now wish you much joy as you use your faceted crystals.

Experience the healing power
of the crystals
